Emil-Teodor Hrisca

MMORPG Server Emulator C++

My key role was to create virtual players that evolved to behave like real players, performing automated tasks and improving the overall gaming experience. In parallel, I designed and developed a website using ASP.NET and Angular, which offered users the ability to connect and interact. performance design and optimize with a focus on user experience, using Angular

Education

● **Application developer designer level 6 (bac+3/4 Master 1)**
From September 2022 to September 2023 AFPA Langueux - France
In this training, I acquired development skills in several programming languages including Python, Java, JavaScript, CSS and HTML. I also learned how to use frameworks such as Spring Boot Angular, ASP NET, React, and create web and mobile applications. In addition, I was trained to use essential tools such as GitHub, Jira and SonarLint for project management and code quality control.

● **Nursing Assistant License - Home Help**
From September 2013 to June 2015 Fundatia Laurentia Roumanie

● **Computer Science High School**
From September 2005 to June 2010 Eugen Nicoara Roumanie

● **General School in Romania**
From September 1997 to June 2005 Ecole Primaire Roumanie

Work experience

● **Backend Developer - Private Emulator Server**
Since December 2023 NexusCode S.R.L Télétravail en France
Since Decembre 2023, I have been developing in C++, C#, SQL, and Python on a private server. My work includes database management, pathfinding system optimization, and algorithm implementation for MMORPG environments. I am paid for the service provided.

● **Front-END Developer Internship 6 months**
From May 2023 to October 2023 Sekoia.io Rennes
As an interactive web component developer,

● **Working in 'open source' projects**
Since January 2018 MMORPG Emulateurs Saint Brieuc
I have studied various Udemy courses to master C++, C#, CSS, HTML Java, Javascript, Python, and I have become familiar with Spring Boot, ASP Net and Angular frameworks. My experience in open source projects is mainly focused on C++ and C#, but I have also used these skills for other languages when needed.

Skills

Programming languages:
C++, C#, Java, php, javascript, typescript, python, css

Frameworks
Spring Boot, Asp Net, Xamarin, Blazor, Tailwind, Bootstrap, Angular, React

Computer skills

Favorite software: : Visual Studio, Vs Code, Jetbrains Ide's
